

Computer File Requirements For Digital Printing

<i>File Formats</i>	<p>Press Ready pdf's are a preference for all signage. We accept .pdf's, .tif's, .eps files. Adobe Illustrator Packages and Adobe InDesign Packages, fonts and placed items included. (Up to Creative Cloud Version)</p>
<i>Resolution</i>	<p>Images should be saved at 100% with a minimum resolution of 72 to 100 dpi. Images resolution must not drop below 72 dpi at the final size.</p> <p>*Please check the image quality on screen before sending the files, ie; if the file is set up at 25% view on screen at 400%</p>
<i>Fonts & Images</i>	<p>We prefer all fonts to be outlined. If the fonts are not outlined, we require the fonts to be provided (PC based). All images to be embedded in the file. Convert all strokes to outlines to avoid issues when scaling.</p>
<i>Colours</i>	<p>Set up files as a CMYK document. Include PMS colours in the files. Black breakdown should be C:30, M:30, Y:30, K:100, to achieve a rich black.</p>
<i>Document Size & Bleed</i>	<p>Documents up to 5 x 5 meters should be provided on a scale of 1:1 A bleed of at least 20 mm (Fabric, Vinyl) or 100 mm (Wallcovering, walltex) is required. For wallcovering prints the maximum printheight is 4800 mm For documents exceeding 5x5 mtrs. use a scale of 1:10</p>
<i>Media</i>	<p>If files are under 10MB they can be emailed. For all large files, upload files using wetransfer.com (Filesize up to 2Gb)</p>
<i>Questions?</i>	<p>If you have any questions, please do not hesitate to contact our prepress department</p>
